Official list of squads not available \*list of squadrons of player b list consists of players involved, from group stage to final. subspecies of the eurasion wolf of the carnivorous eurasia in the polar park in bardu, scientific classification of the noruega kingdom: animalia filum: chordata class: mammalia order: family carnivora: canidae genus: canis species: c. lupu supo suppesces. 1841 (in Latin) was once widespread in Eurasia before the average age. In addition to an extensive paleontological record, Indo-European languages usually several words for wolf, thus attesting the abundance and cultural significance of the animal. was considered very much in the Baltic, Celtic, Slavic, Turkish, Greek, Roman, Roman, and Trivia cultures, which had an ambivalent reputation in the early Germanic cultures. [4] is the largest of gray wolves of the old world, with an average of 39 kg (86 lb) in europe; [5], however, exceptionally large individuals fished €69 tiding thing (152 of thing. [6] [7] his hair is relative short and thick, [2] and is usually in a tawny color, with white in the throat extending to the cheeks. melanist, alvinos and erithists are rare and, mainly, the result of the hybridization of the wolf dog, the uivo of the wolf of Eurasia is much morelt is melodious than that of the north -American gray wolf, whose upper ones are the highest and a stronger in the first health. The two are, however, mutually intelligible, as the US wolves were recorded to respond to European-style howls made by bionies. [9] Many Euro -wolf wolf populations are largely in cattle and trash in dense human activity, although wild bumps such as hand, red deer, deer and wild boast They are still the most important food sources of frog and the most mountainous regions of eastern Europe. Other farewells include reindeer, mortar, mouflon, flavor, output, iBex, suede, wild goats, in -dim deeds and high -deer. [10] Describe Fanic Crostic Wolf Wolf Wolf with the forehead line compared to the forehead is more narrow and gradually decreases to form the nose, which is produced in the same plan with the nose forehead. His ears are higher and a little more closely in each other; its length exceeds the distance between the hearing opening and the eye. Its slimmer loins, the longest legs, the narrower pages and their tail is more finished with a bread. The shorter ears, the wider forehead and the thicker muzzle of the American wolf, with the little hair of the cheek, gives a physiognomy more like the social face of a schimaux dog than the stealth of the stealth a European lobe. [11] Size the size of the Euro Lobs is subject to geographical variation, with animals in frog and scandinadin being larger than residents in Western Europe, [12] having been compared by Theodore Roosevelt to the great wolves of Northwest of Montana and Washington. [13] ADULTS OF THE RANI SHARE MEET 105 - 160 CM (41 - 63 e) LENGTH, 80 - 85 cm 85 cm At shoulder height and weighing on a day 32 - 50 kg (71 - 110 lb), with a weight of 69 - 80 kg (152 - 176 lb). [6] The highest registered was killed after World War II in the Koblyakski area in the Poltavskij region at the Ukrainian SSR, and weighed 86 kg (190 lb). [14] Great weights than 92 Aferences 96 kg (203 - 212 LB) were reported at the ukrary, although the circumstances under which these last animals were weighed. [6]: Central Russian wolves, Swedish and Norwegian wolves tend to be more strongly constructed with deeper shoulders. [12] A wolf killed in Romania was registered to fish 72 kg (159 lb). [15] In the Italian wolves, except the tail, wearing the body's lengths range from 110 to 148 cm, while the height of the shoulders is 50 Aferences 70 cm. Males weigh between 25 and 35 kg (55 and 77 lb) and rarely 45 kg (99 lb). [16] It is known that the now extinct british wolves have reached sizes similar to the wolves of the amico. [17] DISLANY OF THE PAINTING PAINTING PAINTANS OF A GRAY WOLF, FONT-DE GAUME, FRANAMA THE EXTENSION OF NORTHERAL WOLFLETS HAS BEEN AN ORGANIZED EFFORT DURING DAY AGE (CITA f the necessary) and continued to end the nineteenth century. In England, wolf's
